

Product/Service Information

We specialize in unique custom packaging applications using Polyethylene (PE) Foam & Bubble, and Non-Woven Spun Bond Polypropylene (SBPP) protective packaging materials.

Our manufacturing technology utilizes state of the art, sheet, bag pouch, die cut and laminating equipment that allows us to produce custom packaging solutions for the most challenging packaging applications.

Our technology allows us to produce cost effective high quality protective packaging products . Our unique focus on these materials in converted form allow us to be responsive to our customers and offer competitive pricing. We have been in the converting business for more than 20 years.
